DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 13, 19-22, 29-33, 41-46, 55-57, 66-69, drawn to method, classified in class 438, subclass 166.
- II. Claims 7-10, 14-16, 23-26, 34-38, 47-52, 58-62, 70-72, drawn to apparatus, classified in class 359, subclass 1+.
- III. Claims 11-12, 17-18, 27-28, 39-40, 53-54, 63-65, 73-74, drawn to device, classified in class 257, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions *process for producing thin film semiconductor device and laser irradiation apparatus* are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the irradiation step can be performed with another energy source besides a laser beam, such as a high energy lamp, for example.

Inventions *process for producing thin film semiconductor device and semiconductor device* are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2)

Art Unit: 2812

that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device can be made with the irradiated layer created in-situ uniform, rather than using post-deposition irradiation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ronald Kananen on 10/11/00 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viktor Simkovic whose telephone number is 703-308-6170. The examiner can normally be reached on Mon - Fri, 9:00 - 6:00, except every other Friday.

Art Unit: 2812

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Niebling can be reached on 703-308-3325. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1782.
